Customer Reviews

As a graduate student in nursing I highly recommend this book. I have utilized this book as a reference in many of my courses thus far.

If you're taking a Gerontological Nursing class, this book is a good one to have. I gives an over all view of the life of an older person.

it is perfect, this book gives a great deal on information, it is helping my sister with her preparation for her nursing assistant certification. highly recommended

Seller was great. Book arrived on time and as described. Text is so boring though.

Good book

I hate anything that clumps people into a group as though they are all the same. I guess its a good starting point for people who don't have a clue about geriatrics but overall I find it okay

Good

I ordered a lot of books to start the RN program from many different places. This book arrived first and it was in great shape. Thank You. Also, I found the price to be very fair.
