I needed more formulaic math problems to practice, this is very specific for beginning RN I believe. I am in a Psych Tech program, and the math I need to learn is toward an LVN, for this semester. This book had some pages I could use, but a better preview (middle and end) would have helped.

Soo glad I found this online! Very pleased, I used it for my nursing class "pharm calcs"!

My order was delivered in the time span stated. No damage to the package. Very pleased!!!

Like to review my med math here and more problems for practice with my students.
