Histology Flash Cards With Clinical Correlations

Synopsis

This clinically relevant histology flash card set is based on the concepts and full-color illustrations and micrographs in Cui: Atlas of Histology with Functional and Clinical Correlations, a unique atlas covering fundamental histology topics integrated with clinical considerations. The card set is a convenient, flexible, portable, practical study and review tool for histology courses and board exams. Organized and color-coded into two major sections (Cells and Tissues; Organ Systems) and then into 20 chapters, the flash cards provide efficient review with key-labeled images. Answers and clinical information on the back of each card test and reinforce knowledge of key structures and characteristics of cells, tissues, and organs, as well as important clinical information students are required to know for medical courses and USMLE Step 1.
