Customer Reviews

I have been in the eye care profession for nineteen years. Over the years I have read and collected many professional books to continue my education, and expand my knowledge of the eye and it's function, . I refer to "The Ophthalmic Assistant" far more than any of the others books in my library. I use this book to prepare for lecture presentations, as well as hands on teaching and workshops for staff and students. It is the primary book I used to study for my C.O.A. and C.O.T. JCAHPO certifications.

I purchased this book for my office. I am certified in the ophthalmic field and would like to see all my technicians also certified. This book is a great place to start.

This is a very easy read as far as text books go. It was very helpful for my test. Good set up and excellent review section with each chapter.

This book satisfies all the topics which a student of Eye Care Technology needs to study. We at St Philip's College San Antonio Texas selected this book for students to buy for their course.

Although it is not the lasttest edition , it is still a very good book.I really learned a lot from it.
